

Pack Your Bags! We're Going To ...

Way To Go-al Plan

Level 1 = _____ (points for your level)

Level 2 = _____ (points for your level)

Earn by selling (use Cons/Sr Cons/Team Leader points as example):

52,500 ÷ 52 weeks = _____ Per Week Points (PWP).

_____ PWP ÷ \$500* (average party) = ___# of shows per week.

What are 3 ways to earn points:

1. _____

2. _____

3. _____

Earn by selling & recruiting:

3000 pts x 4 (1 recruit for each qtr.) = _____

52,500 pts - _____ (total recruit pts) = _____

_____ new total ÷ 52 weeks = _____ (PWP).

_____ PWP ÷ \$500* (average party) = ___# of shows per week.

This is so doable! Consider how many people you're in front of at all your shows! That's just 1 host or guest every 3 months!

Psst. Recruit 1 more and you just promoted yourself!

*\$500 is being used for ease of calculating. If you know your show average, use that number.

Using your calculations from front side – Break down each month/week with number of points needed and when you could hold shows.

Month	Week 1	Week 2	Week 3	Week 4
January				
February				
March				
April				
May				
June				
July				
August				
September				
October				
November				
December
